We will discuss when Anne is back in the office today. This reporter has another request in to Region 5 for an interview today on a different issue – the West KL Landfill. Do you think there is any connection?

I've not replied back to WMUK's Rebecca Thiele yet. I'm waiting to follow R5's lead on how you'd like to proceed. Thx

Anne and Phillippa,

As you both may know, the question of whether the use of bioremediation is a viable cleanup approach at Allied Landfill still lingers. If EPA were to conduct an interview on this matter, it could put these issues to rest. After we determine our talking points, we should do this interview. If both regional staff and representation from OSRTI and ORD could participate in the interview, it would be more effective.

Thanks,

Michael

Anne and Phillippa,

I'll give you a call in the morning regarding the request (I rec'd a voicemail around 3p ET today...haven't called Kalamazoo NPR back yet). Request is related to a 2014 technical memorandum ORD and I prepared for Michael on PCBs treatment technologies, and the reporter wants a recorded interview to discuss bioremediation. Assume it's related to current activities more than the 2014 assessment.

Thanks,

Greg

Subject: Kalamazoo NPR Affiliate Inquiry

All- Just wanted to let you know that Greg Gervais, the Technology Assessment Branch chief (in OSRTI's Technology Innovation and Field Services Division), received a voicemail message from the Kalamazoo NPR affiliate. The inquiry is specific to the Kalamazoo River SF site (Allied Paper Landfill OU), and, therefore, I recommended that Greg direct the reporter to the Reg 5 public affairs office.
